PT310M v12: Contents

Preface xiii

Using the Exercise Media xiii
Prerequisites for This Course xiii
System Requirements xiv
Becoming Avid Certified xiv
Pro Tools Certification xiv
Conventions and Symbols Used in this Guide xv

Lesson 1. Pro Tools HD Hardware Configuration 1

Setting Up a Pro Tools HD System 2
Pro Tools | HDX System Basics 2
Pro Tools 12 Systems Comparison 2
Pro Tools 12 Software Features 3
Components of Pro Tools HD Hardware Systems 4
Benefits of Pro Tools DSP-Accelerated Hardware Systems 7
System Compatibility Information 7
Pro Tools HD Hardware Connections 8
Working With Avid Peripherals 9
SYNC HD 9
Avid PRE 10
Audio Interface Calibration 18
Purpose of I/O Calibration 18
Some Notes about Calibration 18
Installing Additional Pro Tools Software Options 20
Drivers and Codecs 20
Plug-Ins and Virtual Instruments 20
Non-Administrator (Standard) Accounts 20
Implications of Non-Administrator (Standard) Accounts 20
Configuring a Non-Administrator (Standard) Account for Pro Tools Users 21
Pro Tools Session File Interchange 22
Session Compatibility Between Pro Tools HD and Pro Tools 22
Sharing Sessions Created on Different Pro Tools Software Versions 23
Review/Discussion Questions 24

Exercise 1. Pro Tools HD Hardware Configuration 26

Create a Customized Equipment List 27
Exercise 1 Answer Key 28

Lesson 2. Troubleshooting a Pro Tools System 29

Troubleshooting Operational Issues 30
Using the DigiTest Utility 30
Using Avid Knowledge Base 33

Deleting Pro Tools Settings and Database Files 35
Deleting Settings Files on Mac Systems 35
Deleting Settings Files on Windows Systems 36
Deleting Database Files 38
Understanding Voice Allocation 39
Track Priority and Voice Assignment 40
Number of Voices 40
Dynamic Voice Assignment 41
Changing the Priority of Tracks 41
Playback Engine Advanced Options 43
Disk Playback Cache Size Settings 43
Monitoring DSP Resources (Pro Tools | HDX Systems Only) 46
Monitoring Native Resources (Recap) 46
Advanced Pro Tools I/O Setup 48
Remapping I/O 48
I/O Remap Indication in the Bus Page 48
Show Last Saved Setup 49
Restore from Session 50
When to Restore Previous I/O Settings 51
Monitor and Audition Path Upmixing and Downmixing 51
Importing IO Settings from Session Files 51
Review/Discussion Questions 52

Exercise 2. Troubleshooting a Pro Tools System 53

Getting Started: Using Avid Knowledge Base 54
Opening and Playing a Session 54
Importing I/O Setup Pages 56
Finishing Up 56
Exercise 2 Answer Key 57

Lesson 3. Keyboard-Based Control of Pro Tools 59

Parts of the Keyboard 60
Modifier Keys 60
Modifier Key and Menus 61
Modifier Keys and Track Parameters/Displays 61
Focus Keys 65
Assigning Keyboard Focus 65
Active Window for Keyboard Focus 66
Commands Keyboard Focus Mode Shortcuts 67
Function Keys 73
Edit Mode Function Keys 73
Edit Tool Function Keys 73
Numeric Keypad Options 74
Classic Mode 75
Transport Mode (Default) 75

Shuttle Mode ... 76
Shuttle Lock Mode ... 76
Other Shortcut Operations ... 77
New Track Shortcuts ... 77
Workspace Browser Shortcuts ... 78
Window and Display Shortcuts ... 79
Save Command Shortcuts ... 80
Window Configurations ... 80
Review/Discussion Questions ... 81
Exercise 3. Tactile Control of Pro Tools ... 83
Editing Shortcuts: Commands Keyboard Focus Mode ... 84
Editing Shortcuts: Menu Equivalents and Keyboard Modifiers ... 86
Mixing Shortcuts: Menu Equivalents, Modifiers, and Key Commands ... 87
Exercise 3 Answer Key ... 88
Lesson 4. Media Interchange and System Optimization ... 91
Understanding Cloud Collaboration ... 92
Optimizing Sessions for Collaboration ... 92
Setting the Location for the Local Cache ... 93
Removing Files from the Local Cache ... 94
Restoring a Project from the Cloud ... 95
Recovering Cloud Storage after Collaborating ... 95
Working with AAF Sequences ... 97
Overview of AAF ... 97
Embedded or Referenced Media ... 98
Importing AAF Tracks into Pro Tools ... 98
Working with MXF Audio ... 102
How MXF Files are Used ... 102
Importing MXF Audio Files ... 103
Using Session Templates ... 103
Saving a Session as a Template ... 103
System Template Categories ... 104
Manually Managing System Template Files ... 105
Creating New Sessions from Templates ... 105
Converting Files Between Sessions and Templates ... 106
Using the Avid PRE with Pro Tools ... 106
Third-Party Support for Avid PRE Communication Protocol ... 106
Controlling PRE from Pro Tools ... 107
Grouped Playlist Synchronization ... 109
Multitrack Recording Using Playlists ... 109
Adding Tracks During a Recording Session ... 110
Review/Discussion Questions ... 113
Exercise 4. Importing/Exporting and Session Interchange ... 115
Importing Tracks from an AAF ... 116
Importing Session Data ... 118

Optimizing Playback [Challenge] 120
Creating a Copy for a Non-HD System [Challenge] 120
Saving the Session as a Template 121
Exercise 4 Challenge Tasks Key 122

Lesson 5. Advanced Editing 125

Advanced MIDI 126
Select and Split Notes (Recap) 126
Considerations for Using Select/Split Notes 127
Sample-Based MIDI Tracks 129
Nudge and Grid Shortcuts 130
Changing the Nudge Increment 130
Changing the Grid Value 130
Nudging by the Next Nudge Value (Recap) 131
Nudging a Clip's Contents (Recap) 131
Trimming with Nudge (Recap) 132
Nudging an Audio Selection (Recap) 132
Pre- and Post-Roll Audition Techniques 132
Understanding Audition Commands and Options 133
Using Audition Modifier-Key Shortcuts 134
Advanced Multitrack Drum Editing 135
When to Use Collection Mode 135
How to Use Collection Mode 136
Elastic Audio versus Beat Detective for Multi-Miked Drums 138
Using Elastic Audio for Multi-Miked Drums—Workflow 138
Fixing Problems after Quantizing with Elastic Audio 141
Deciding between Beat Detective and Elastic Audio 142
Advanced Elastic Audio 143
The Elastic Properties Window 143
Elastic Property Specifics 144
Elastic Audio Processors and Parameters 146
Time Compression Expansion (TCE) Modes 146
Review/Discussion Questions 151

Exercise 5. Advanced Drum Editing 153

Grouping Tracks for Editing 154
Best Practices for Editing 156
Conforming Drum Tracks with Elastic Audio 161
Quantizing with Beat Detective versus Elastic Audio 163

Lesson 6. Synchronization and Collaboration 165

Clock Versus Positional Reference 166
Clock Reference 166
Positional Reference 166
Resolved Systems 166

Avid SYNC HD 166
Avid SYNC HD Services 167
Configuring the Avid SYNC HD 167
Selecting Clock Sources 170
Using an HD-Series Audio Interface as the Clock Source 170
Using the SYNC HD as the Clock Source 171
Timecode Formats in Music Production 174
Setting the Timecode Rate 174
Selecting the Proper Timecode Format 174
Using Longitudinal Time Code (LTC) 176
Syncing with LTC and Word/Video Clock 176
Recording While Slaved to an External Timecode Source 177
Synchronizing to Analog Multitrack Tape Machines 178
Using MIDI Timecode 179
Uses for MTC 179
MTC versus MIDI Beat Clock 179
Understanding Satellite Link 179
Supported Satellite Configurations 179
Satellite Link in Music Production 180
Authorization and Configuration 180
Putting Satellite Systems Online 181
Controlling Satellite Behavior 182
Real-Time Cloud Collaboration 183
Communicating with Remote Collaborators 183
Sharing Tracks for Collaboration 183
Modifying a Shared Project 184
Considerations for Posting Track Changes 187
Monitoring Your Storage Usage 188
Review/Discussion Questions 189

Exercise 6. Synchronization and Collaboration 191

Part One: Syncing Two Pro Tools Systems 192
Part Two: Syncing Pro Tools Systems with Satellite Link 194
Part Three: Making Changes with Cloud Collaboration 197

Lesson 7. Pro Tools HD Mixing Concepts 201

Bit Depth, Dynamic Range, and Dither 202
Quantization and Quantization Errors 202
Bit Depth and Dynamic Range 203
Comparing Pro Tools|HDX and Pro Tools|HD Native Mix Engines 205
The Pro Tools Native Mixer 205
Original (Legacy) Pro Tools TDM/HD Mixer 205
The Pro Tools|HDX Mixer 205
The Avid Audio Engine 206
The Avid Video Engine 207

Fixed-Point Versus Floating-Point Processing 208
Fixed-Point Processing 208
Floating-Point Processing 208
DSP-Based Mixers and DSP Usage 209
HDX Architecture 209
Mixer Creation 210
The Dither Process 213
How Dither Works 214
When to Apply Dither Plug-Ins 214
How to Apply Dither 215
POW-r Dither Details 215
The Pro Tools HD Mixer 216
Double-Precision Processing 216
Mixer Headroom 216
Mixer Footroom 216
The Audio Signal Path Through HDX 217
Analog to Digital Conversion 217
Plug-In Processing in Pro Tools|HDX 217
64-Bit Floating Point Mixer 217
Master Faders 218
Appropriate Use of Native Plug-ins 218
Voice Usage and Total Latency for Native Plug-Ins 219
Mixing Native and DSP Plug-Ins on an Audio Track 222
Review/Discussion Questions 224

Exercise 7. Mixer Experiments 226

Gain Staging and Mixing 227
Headroom in 32-Bit Float Files 232
The Sound of Dither 234
Voice Usage with Native and DSP Plug-in Combinations 235

Lesson 8. Advanced Mixing Techniques 241

Common Mixing Preferences 242
Solo Modes (Recap) 242
Solo Button Behaviors (Recap) 244
Understanding Advanced Delay Compensation 244
Delay Compensation and Hardware Inserts 244
Delay Compensation and Recording 247
Using Plug-In Preferences 247
Plug-In Menu Hierarchy 247
Plug-In Favorites 248
Mixing Techniques 249
Shortcuts for Sends and Inserts 249
Submixing (Recap) 250
Creating a Mix Bus Submaster 250
Stem Mixing Example 251

Master Faders versus VCA Masters 252
Clipping Considerations 252
Using Master Faders as Bus Trims 254
Using VCA Masters to Adjust Source Tracks 255
When to Use Master Faders and VCA Masters 255
VCA Master Automation 255
VCA Composite Volume Graphs 255
VCA Automation 256
Review/Discussion Questions 259

Exercise 8. Advanced Mixing and Routing 261

Part 1: Organize a Session for a Final Mix 262
Part 2: Skills Review 265
Exercise 8 Skills Review Key 267

Lesson 9. Advanced Automation Techniques 269

Using Latch Prime 270
Enabling Latch Prime 270
Priming Controls 270
Unpriming Controls 271
Understanding Static Automation (Recap) 272
Static Automation versus Real-Time Automation 272
Families of Static Automation: Write Buttons versus Edit Commands 272
Applying Static Automation 273
Automation Window Write Buttons 273
Edit > Automation Submenu Commands 274
Automation Command Usage Examples 276
Extending Automation 276
Suspending Automation and Applying Changes 277
Using Trim Values to Adjust Existing Automation 278
Using Glide Automation to Transition Effects 279
Using Preview Mode and Punch Preview 282
How Preview Mode Works 282
Basic Outline for Using Preview Mode 283
Writing Isolated Parameters (Punch Preview) 283
Usage Example of Preview Mode 285
Suspending Preview Mode 286
Preview and Trim Mode 287
Using Capture Mode and Punch Capture 287
How Capture Mode Acquires Settings 287
Basic Capture Operation 288
Punch Capture Operations 288
Capture/Punch Capture Workflow Examples 289
Using Capture and Trim Mode 290
Using Capture and Preview Modes Together 291

Using Join and AutoJoin....292
Using the Join Function....292
Using the AutoJoin Function....293
Miscellaneous Automation Techniques....294
Resuming Recording of Mute Automation....294
Writing Automation During Record....295
Review/Discussion Questions....297
Exercise 9. Advanced Automation....299
Part 1: Apply Automation to a Mix....300
Part 2: Skills Review....307
Exercise 9 Skills Review Key....309
Lesson 10. Music Delivery....311
Transferring MIDI Data....312
Transferring MIDI to Another Pro Tools Session....312
Exporting to Another MIDI Application....312
Exporting to Sibelius....314
Viewing Other Parts in Sibelius....315
Using AAF Export....316
AAF Export Process....316
Options for AAF Export....317
Using MXF Audio Export....319
Exporting Tracks as AAF with MXF Audio Files....319
Exporting Clips as MXF Audio Files....319
Exporting MXF Audio Files Using Bounce to Disk....320
Archiving and Transferring Sessions....321
Using Save Copy In....321
Exporting Selected Tracks as a New Session....322
Review/Discussion Questions....324
Exercise 10. Exporting Multitrack Sessions....325
Exporting to Earlier Versions of Pro Tools....326
Exporting an AAF Sequence and Audio Files....328
Appendix A. Pro Tools HD-Series Audio Interface Calibration....331
Calibrating an HD I/O or 192 I/O....332
Calibrating a System with Mixed HD-Series Audio Interfaces....333
Index....335
